**AMENDMENTS TO THE ABSTRACT:**

Please amend the Abstract as follows:

An Abstract of the Disclosure is submitted herewith on a separate sheet.

ABSTRACT OF THE DISCLOSURE

A selectively light-absorptive material for a color display, comprising a tetrazaporphyrine derivative having the formula:

where  $R_1$ ,  $R_2$ ,  $R_3$ ,  $R_4$ ,  $R_5$ ,  $R_6$ ,  $R_7$  and  $R_8$  are independently selected from the group consisting of hydrogen; an unsubstituted phenyl group, an alkyl group; an alkoxy group; a nitro group; halogen atoms; a halide; a cyano group; an alkylamino group; an aminoalkyl group; and a phenyl group having a substituent selected from an alkyl group, an alkoxy group, a nitro group, halogen atoms, a halide, an alkylamino group, an aminoalkyl group and a cyano group, or two neighboring substituents among  $R_1$ ,  $R_2$ ,  $R_3$ ,  $R_4$ ,  $R_5$ ,  $R_6$ ,  $R_7$  and  $R_8$  are fused and substituted with 1 to 3 aromatic cyclic compounds, and unsubstituted groups among  $R_1$ ,  $R_2$ ,  $R_3$ ,  $R_4$ ,  $R_5$ ,  $R_6$ ,  $R_7$  and  $R_8$  are independently selected from the group consisting of hydrogen, an alkyl group, an alkoxy group, an allyl group, halogen atoms, a halide, a cyano group and a nitro group. The material also comprises a plastic resin, an organic solvent and/or an infrared ray blocking agent.
